DERIVED LONG-DOCUMENT TEST FIXTURE ? NOT AN OFFICIAL SEC PDF OR COMPLETE FILING

Issuer: Microsoft Corporation

CIK: 0000789019

Form: 10-K

Accession: 0000950170-24-087843

Filed: 2024-07-30

Fiscal year ended: 2024-06-30

Selected consolidated financial facts (USD millions):

Revenue: 245,122

Operating income: 109,433

Research and development expense: 29,510

Net income: 88,136

Selected business context:

Microsoft reports productivity and business processes, intelligent cloud, and more personal computing activities. Cloud demand, datacenter capacity and AI infrastructure are material operating themes.

Selected risk excerpts, paraphrased for testing:

- Cloud and online services depend on datacenter capacity and reliability.
- Cybersecurity incidents could disrupt services or expose information.
- Competition and rapid technology change can affect demand and margins.
- Regulatory requirements differ across jurisdictions.

The PDF generator repeats labelled excerpts to create a long-document stress fixture while preserving a small, reviewable source file. Repetition is synthetic and must not be interpreted as additional filing content.

Fiscal year ended: 2024-06-30

Selected consolidated financial facts (USD millions):

Revenue: 245,122

Operating income: 109,433

Research and development expense: 29,510

Net income: 88,136

Selected business context:

Microsoft reports productivity and business processes, intelligent cloud, and more personal computing activities. Cloud demand, datacenter capacity and AI infrastructure are material operating themes.

Selected risk excerpts, paraphrased for testing:

- Cloud and online services depend on datacenter capacity and reliability.
- Cybersecurity incidents could disrupt services or expose information.
- Competition and rapid technology change can affect demand and margins.
- Regulatory requirements differ across jurisdictions.

The PDF generator repeats labelled excerpts to create a long-document stress fixture while preserving a small, reviewable source file. Repetition is synthetic and must not be interpreted as additional filing content.

Microsoft reports productivity and business processes, intelligent cloud, and more personal computing activities. Cloud demand, datacenter capacity and AI infrastructure are material operating themes.

Selected risk excerpts, paraphrased for testing:

- Cloud and online services depend on datacenter capacity and reliability.
- Cybersecurity incidents could disrupt services or expose information.
- Competition and rapid technology change can affect demand and margins.
- Regulatory requirements differ across jurisdictions.

The PDF generator repeats labelled excerpts to create a long-document stress fixture while preserving a small, reviewable source file. Repetition is synthetic and must not be interpreted as additional filing content.
